LT: I can use evidence to support my evaluation of the Big Bang Theory

Discussing the Big Bang

Part 1: Sharing Information about the Big Bang

Question/Topic	Key facts & details Did they find an answer? What information did you learn?	Your response Do you have other questions? Does this change your mind about the Big Bang Theory?

Part 2: Free Writing

After the other students have shared their information, please respond to the following claim:

The Big Bang Theory is the correct explanation for the beginning of the universe.

our opinion does not need to have changed, but your reasoning/explanation should include information hat we've learned about in the past few days. If you still believe in the Big Bang, then how do you explain all the missing information? If you don't believe in the Big Bang, then how do you explain red shift, etc.?

Part 3: Class Discussion

Use this space for notes about what other students say. Suggestions of things to listen for:

- Points/logic you agree with.
- People that are impressing you in this discussion.
- Points/logic you disagree with
- Things you hadn't thought about.
- Good rebuttals.
