LT: I can create a comic that demonstrates my understanding of a star's life and death.

Star Comic

In this comic, you will show me that you understand how a star is formed, and how it dies. Make sure your final product has the following:

- At least 6 slides
- A brief description (1-2 sentences) for each slide.
- Visual elements
- Explanation of a star's formation, and its main stages (you can choose either to depict an average star or a massive star)

| Criteria | 3 | 2 | 1 | 0 |
|------------------------|--|--|--|------------------------------------|
| Information | All the information is correct and thorough. Understanding of the topic is clear. | There are 1-2 informational errors, or there is a step missing in the life cycle of a star. | Many steps are missing, or the steps are extremely incorrect or inaccurately explained. | Little to no information is given. |
| Visual Elements | Each slide has drawings that demonstrate effort, neatness, and creativity. Visual elements enhance understanding of the topic. | There is some effort demonstrated, but some elements may be sloppy or not relate to the the topic. | Many of the slides are messy or quickly done, or the drawings do not relate to the topic at all. | There are few to no drawings. |

Total: _____/6
