

Unit 3: Stars and Elements

Driving Question: How can looking at the same information from different perspectives pave the way for progress?

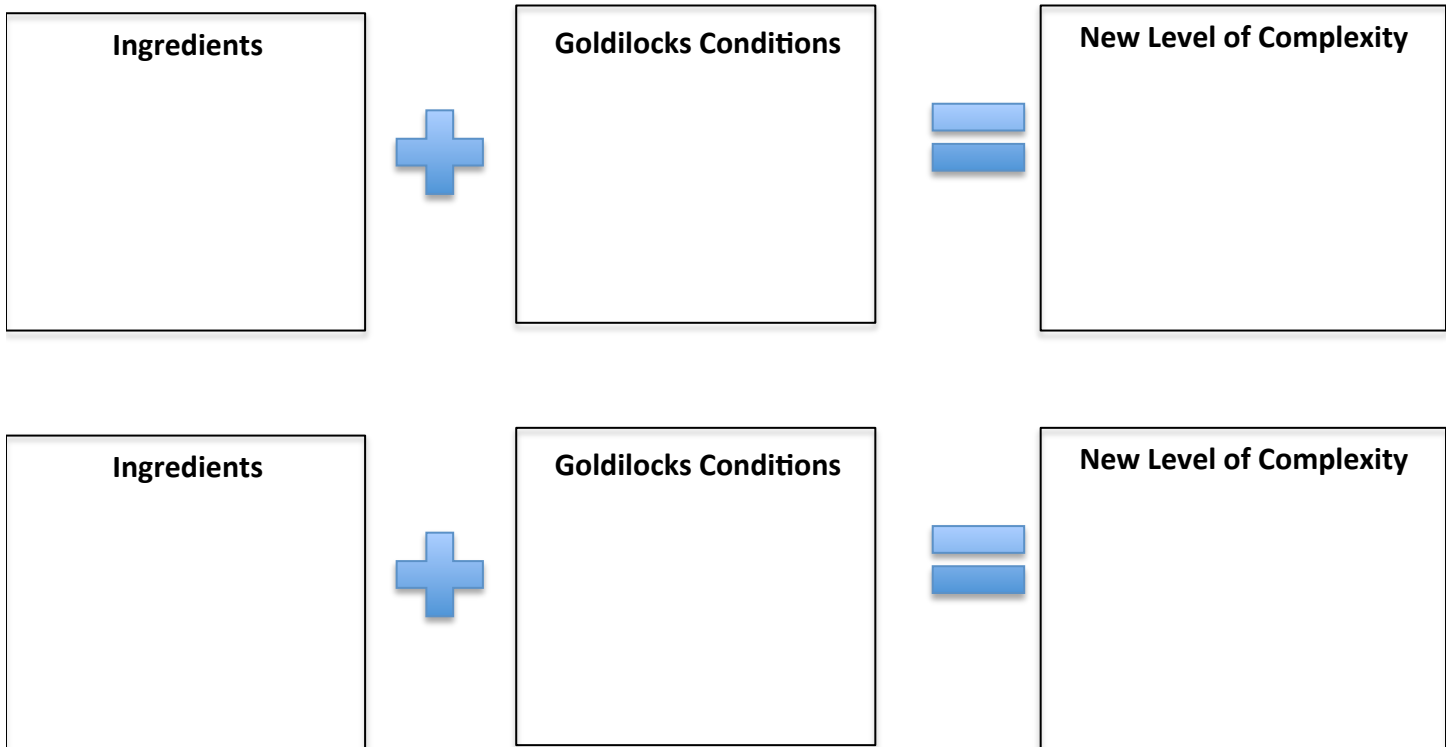

Unit Description: This unit encompasses two thresholds in Big History-- the stars lighting up and the formation of elements. We're going to

By the end of the unit, you should understand and be able to:

- Explain the formation of stars
- Explain how the death of stars creates elements.
- Investigate and report on how the creation of elements is important to us today.
- Understand the concept of periodization.
- Understand what scholars from multiple disciplines know about a topic and the questions they can ask.

Your assessments this unit will be:

- A comic strip about the formation of stars
- A project on one of the elements in the periodic table.
